Project Design
Solution Architecture

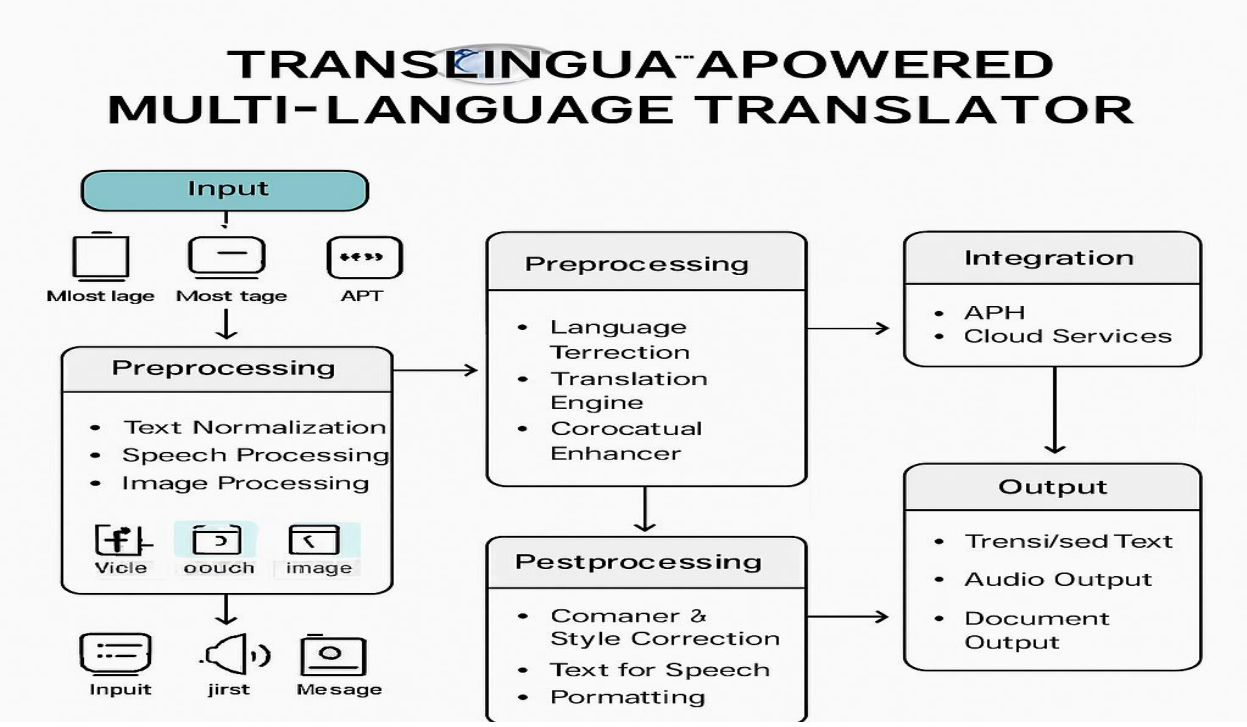
Date	**18 Feb 2026**
Team ID	**LTVIP2026TMIDS71831**
Project Name	**Translingua: ai-powered multi-language translator**
Maximum Marks	**4Marks**

Solution Architecture:

Solution architecture is the process of designing and describing technology systems that solve specific business problems. It acts as a bridge between business needs and technical execution.

. Identify the Best Tech Solution: Choose technologies that effectively address business challenges.

. Describe System Characteristics: Communicate structure, behavior, and features to stakeholders.

. Define Features & Phases: Lay out development stages and functional requirements.


. Provide Specifications**:** Establish guidelines for managing and delivering the solution.
