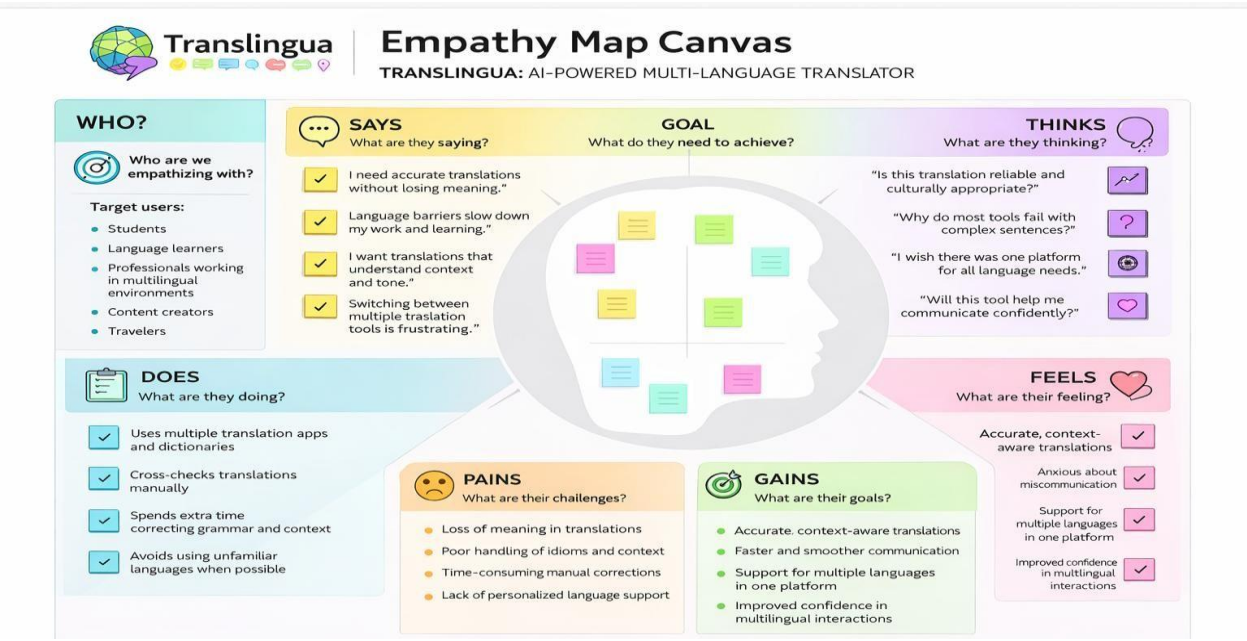
Maximum Marks	**4 Marks**

Empathy Map Canvas:

An empathy map is a simple and visual tool used to gain deeper insight into users' behaviors, needs, and emotions.
It helps teams understand users from their perspective, enabling the design of effective, user-centered solutions.
Creating an impactful solution requires understanding the real problems users face and the context in which they operate.
This exercise encourages teams to step into the user's shoes and identify their goals, frustrations, and motivations.

EMPATHY MAP CANVAS:

TRANSLINGUA: ai-powered multi-language translator



TRANSLINGUA

AI-POWERED MULTI-LANGUAGE TRANSLATOR

SAYS

- "I need accurate translations.
- Language barriers slow me down.
- I want context-aware translations.
